Altion by Alter Spring Under the Spring Spring Company of the Spring Compan Saw Problem in November

"When I left home for Europe in November this problem was already facing me as one among many others for which assistance had to be found, in the protection of our American farmers, lest from failure to find a market for his product during the armistice and pending the wider markets of peace his prices might fall below his cost of production, entailing great waste of surplus commodities.

"We have found it possible to protect the American farmer in the two and one-half months since the armistice. This we have done by cooperating with the Allies, in opening wider markets to neutral countries and by relief snipments into the liberated territories. The next and last six weeks of the high fat production season will be still more difficult to manage, as peace cannot be expected in that time, restoring extended markets."
